

treysan

WHO IS? TREYSAN PREFABRICATED

A DISTINGUISHED COMPANY WITHIN IC HOLDING, TREYSAN PREFABRICATED WAS ESTABLISHED IN ANKARA IN 1975.

Since then, with its product range Treysan is serving to the oil / gas sector companies, construction companies, military organizations, armies and relief organizations by providing temporary and permanent prefabricated camp solutions. Top quality production has been a constant principle since the early days; today Treysan Prefabricated is proud to be the sector leader in Turkey, enjoys recognition among the most reputable global brands, and faces a confident future with a strong reach that spans 75 countries.

OUR PRODUCTS

Accommodation Containers

Treysan's Accommodation Containers provide the perfect product with flexible design and production, simple installation in the factory or in the field, as well as easy transportation and re-location.

Prefabricated Panelized System Buildings

Treysan designs and manufactures high-tech and superior quality panel system buildings that stand out in terms of short production times, services of transportation and installation, adaptable designs and easy re-location as well as a range of applications in any kind of environmental conditions.

Pre-engineered Steel Buildings

Quick and cost-saving alternatives for a wide range of sites, Treysan's pre-engineered steel buildings are ideal in terms of their flexible dimensions, speedy production and easy dismantling or relocation that is suitable for installation in any area of the world as well as use over longer periods of time.

Permanent Structures

Treysan also offers permanent solutions in pre-fabricated construction, catering to a range of budgets with practical applications in permanent building.

Rig Camps

These are welded type containers which can satisfy the needs and accelerate the process of relocation with the sliding system it's equipped with under harshest conditions in Oil & Gas fields.

Special Equipment Containers

These are welded type containers which can satisfy the needs for the process of measurement stations (local equipment Rooms) in Oil & Gas fields.
