

Versatility

Of our devices makes room for a variety of additional features and accessories such as:

Steam Sterilizer

General Features

High Quality Stainless Steel (316 or 304 AISI),
Used in hospitals, laboratories, prosthetics
manufacturers, dental and veterinary,
Ergonomic design for easier and safer loading
unloading operations,
In-built Steam Generator,
Easy one side access for service and maintenance.

Control and Observe

Every step on a handy 7" Touchscreen and PLC,
Full-automatic programs, adjustable
for specific calibrations,
Numeric and graphic display ,
Integrated 40-character thermal printer,

Safe and Sound

With security measures that protect the operator and
the device,
Emergency stop button,
Sensors against obstructions on the doors pathway,
Doors locks under pressure,
Unable to open both doors at once in
Septic-Aseptic models.

Visual, written and audial warning systems,
Data storage of up 1000 cycles,
USB port for transferring saved data to other media,
Communications via RS 232 and RS485 Ethernet Module,
4 Analogue Manometers.

Steam Sterilizer Equipments

Transport Trolley

Easy load system for
stackable baskets and
containers.
Compatibility with ISO and STU
standard storage shelving
systems.
Availability of height adjustable
and fixed height transfer trolley.

STU Baskets

Compatibility with ISO and STU standard
shelving systems.

Inner Trolley

Grid type loading rack for ISO
standard baskets.
Flexibility in height adjustment of
the levels maximize load capacity.
Compatibility with ISO standard
storage shelves systems.

For a Green Future

As Sterilmed Medical, we want to leave a green future for next
generations and we manufacture our products with that
sensitivity; a zero waste mentality. All materials used in
manufacturing our devices are recyclable or eco-friendly and
we constantly work on increasing the efficiency of devices for
less water and energy consumption.

Quality Without Compromise

Is our motto and we manufacture our devices assuring their quality in compliance

Medical Device Regulations:
MDR 2017/745/EU

Device Classification:

Low Voltage Directive:
EN 60601-2-040

EMC Directive:

Pressure Equipment Directive:
EN 13445 (Pressure Vessels)

Sterilization – Steam sterilizers – Large sterilizers:
EN285

Quality Management System Requirements:
EN – ISO 9001

Medical Devices – Quality management systems –
Requirements for regulatory purposes:
ISO 13485

Environmental Management Systems – Requirements
with guidance for use:
ISO 14001

Washer & Disinfector

Sterilmed Medical Washer Disinfectors available to wash and disinfect heat-resistant and reusable materials like Surgical Instruments, Operating Room Containers and Laboratory Instruments.

General Features

High Quality Stainless Steel (316 or 304 AISI)
Used in Hospitals, Outpatient Clinics,
Rehabilitation Centers and Laboratories ,
Ergonomic design for easier and safer loading
unloading operations,
3 water inlets for cold, hot and distilled water, Easy
one side access for service and maintenance,
Expanded capacity for detergent and neutralizer, Easy
to remove and clean internal filter.

Safe and Sound

With security measures that protect the
operator and the device,
Password protection,
Emergency stop button,
Tempered Glass door resistant to
impact and high temperatures,
Doors locks once the programs start
running,
Unable to open both doors at once in
Septic-Aseptic models.

Control and Observe

Every step on a handy 7" Touchscreen and PLC,
Full-automatic programs, adjustable for
specific calibrations ,
User-Friendly easy to use UI,
Numeric and graphic display ,

Integrated 40-character thermal printer,
Visual, written and audial warning systems,
Data storage of up 1000 cycles,
USB port for transferring saved data to other media,
Communications via RS 232 and RS485 Ethernet Module.

Washer & Disinfector Equipments

DIN Baskets

Compatibility with ISO and DIN
standard storage shelving systems.

Anesthesia Rack

Specially designed inner trolley
that is compatible with Anesthesia
Medical Equipment / Accessories.

Inner Trolley/ Rack

Grid type loading rack for ISO standard baskets.
Flexibility in height adjustment of the levels
maximize load capacity.
Compatibility with ISO standard storage shelves
systems.

Slipper Rack

Transport Trolley

Easy load system for stackable baskets and
containers.
Compatibility with ISO and DIN standard
storage shelving systems.
Availability of height adjustable and
fixed height transfer trolley.

Versatility

Of our devices makes room for a variety of additional
features and accessories such as:

Turbo Heater

Condenser
Cooling

Thermal
Printer

Rack Identification
System

Drain Pump

Plasma Sterilizer

Sterilmed Medical Plasma Sterilizer is an Eco-Friendly, Low Temperature Sterilizer used in sterilizing thermo-sensitive hospital equipment and materials with the use of H₂O₂ (Hydrogen peroxide).

General Features

High Quality Stainless Steel (316 or 304 AISI),
Used in hospitals, laboratories, prosthetics manufacturers, dental and veterinary,
Easy to use Plug and Play device,
Rapid Warmup & Drying System,
Safe to use, yields no residue (only water and oxygen,)
Fast running cycle to increase turnover rate of equipment and materials.

Safe and Sound

With security measures that protect the operator and the device.
Emergency stop button,
Sensors ensure that doors are locked,
Doors locks during procedure, Unable to open both doors at once in, Septic-Aseptic models.

Control and Observe

Every step on a handy 7" Touchscreen and PLC,
Full-automatic programs, adjustable for specific calibrations,
User-Friendly, easy to use UI,
Numeric and graphic display,
Integrated 40-character thermal printer,

Visual, written and audial warning systems,
Data storage of up 1000 cycles,
USB port for transferring saved data to other media,
Communications via RS 232 and RS485 Ethernet Module.
